

Les légumes dominos

Dominos Instructions

Set-up:

Print the pages with dominoes on them onto card stock.

Laminating them can help make them heavier and stay in place during the game. The 7 pages of dominoes create 1 set for 1 game.

The dominoes game is best played with a group of 3-4 students, print multiple sheets to make more than 1 set.

This game is best played on a large table or on the floor to give students space.

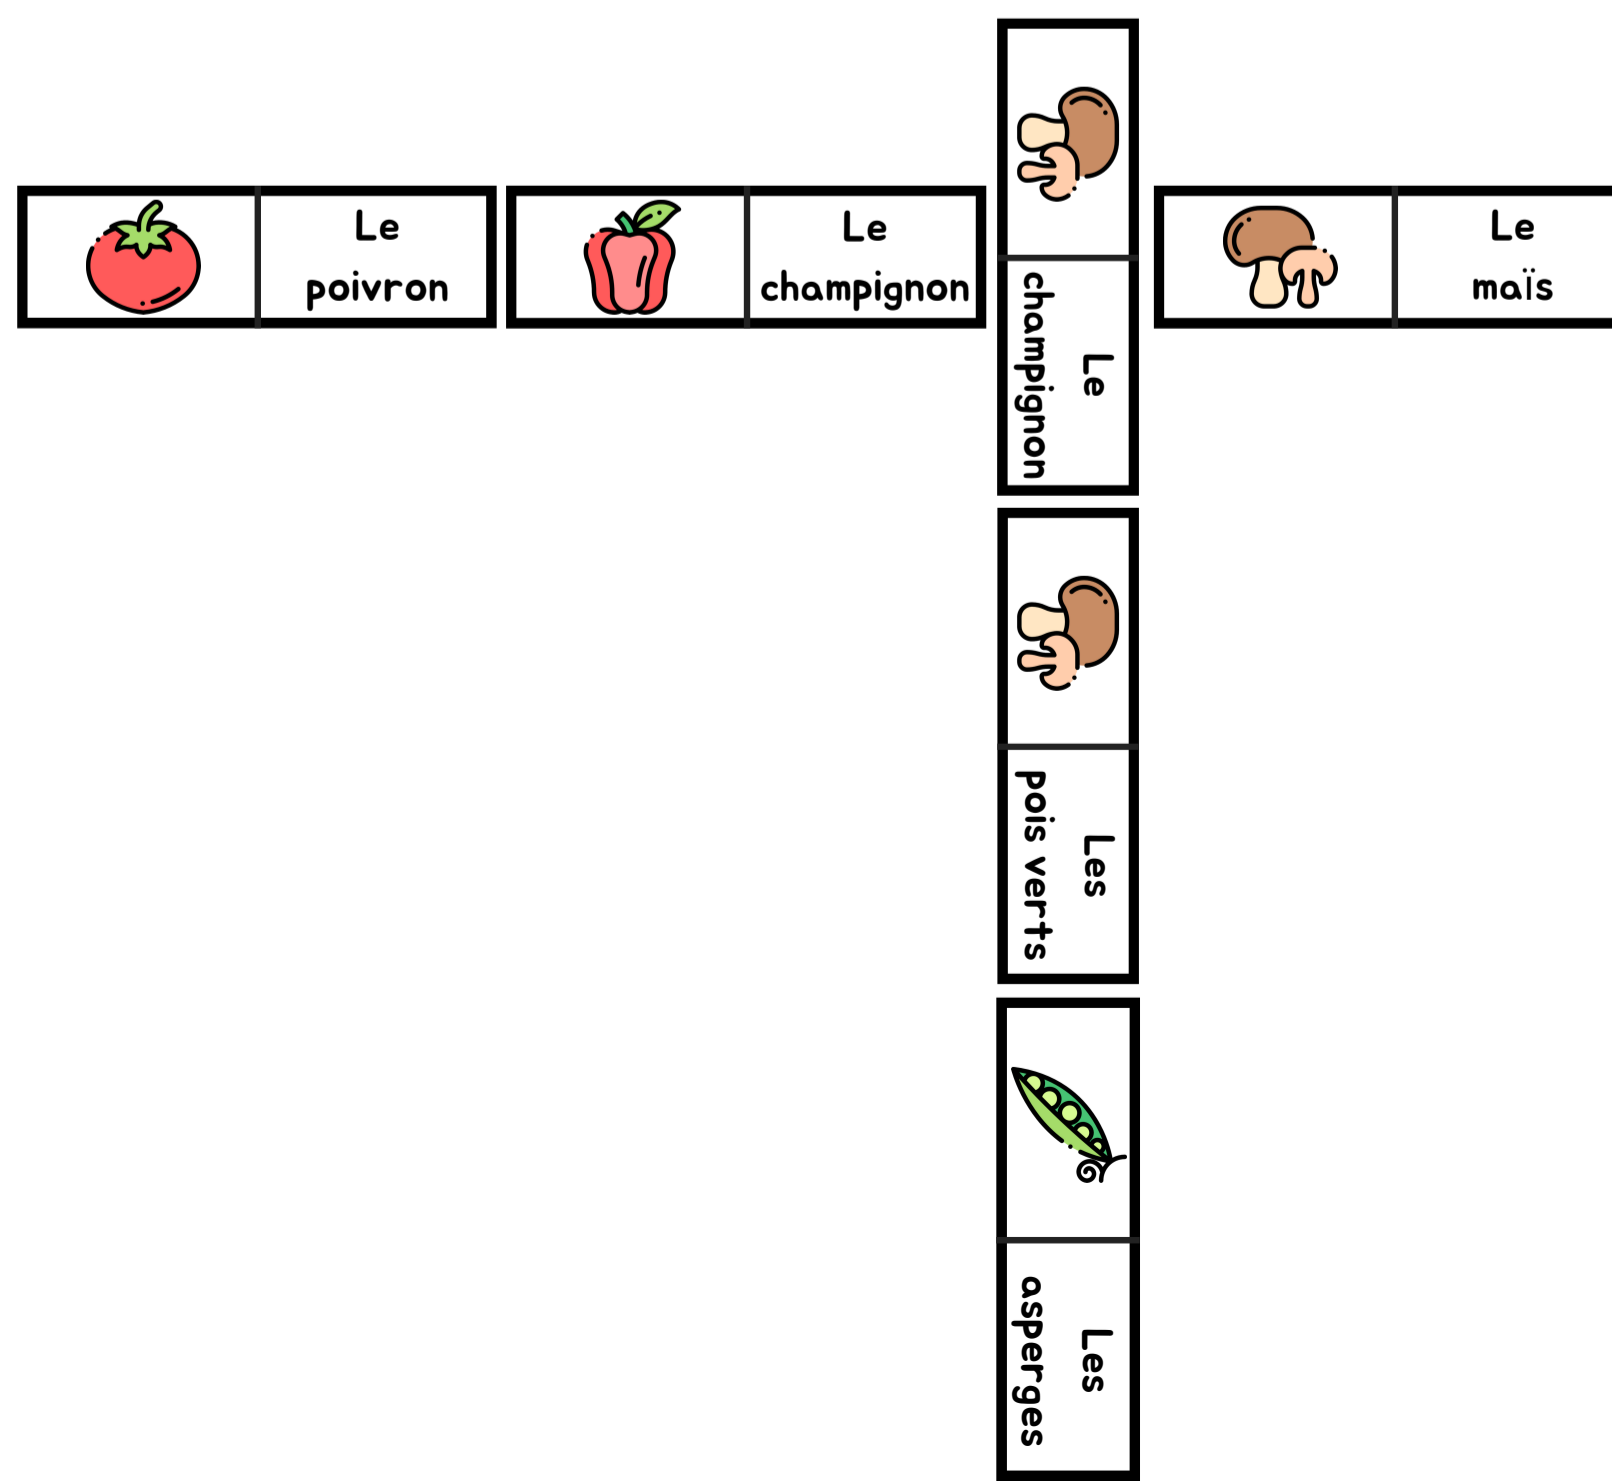

This set also includes labels or cards with the vocabulary words in this game. They can be printed out and laminated for use. Feel free to place them around the classroom or use them for lessons.

Game concept:

This game allows students to recognize vocabulary words they have learned with their corresponding images.

The idea is to have them match the vocabulary word in French to its picture in order to have students become more familiar with the words.

Ex.

RULES

01.

Each player starts with 5 dominoes, the rest of the dominoes are to be placed facing down in a pile. Players don't need to hide their dominoes from others.

02.

Play rock paper scissors to decide who is to go first. The person to go first starts by laying down a domino.

The next player lays down a domino besides what the first player has placed, that domino has to match the word end of the domino with the picture end.

PICTURE TO PICTURE IS NOT A MATCH.

WORD TO WORD IS NOT A MATCH.

Picture to word. Word to picture.

03.

If a match can't be made, the player is to pick up a card from the pile of dominoes.

EACH TIME A DOMINO IS BEING PLAYED, THE WORD ON THE DOMINO SHOULD BE READ IN FRENCH.

04.

Doubles are cards with the same word as the picture. Doubles are to be placed at a 90 degree angle. You can either match a picture or word to the double.

05.

The first person to run out of dominoes wins!
